## Material & Fabric Composition

Crafted from a luxurious high-tech satin, this dress boasts a composition of 97% Recycled Polyester and 3% Elastane. The fabric has a substantial yet fluid drape, with a smooth, cool-to-the-touch handfeel and a subtle, sophisticated sheen. With a weight of 180 GSM, it provides excellent opacity and structure while maintaining comfortable wearability. The small percentage of elastane ensures a comfortable stretch for ease of movement.

## Care Instructions

To maintain the pristine condition and longevity of your satin dress, we recommend a delicate approach to care. Machine wash cold on a gentle cycle (max 30 degC) with similar colors, using a mild detergent. Do not bleach. Tumble dry low or, for best results, hang dry in the shade to prevent creasing and preserve the fabric's integrity. Iron on a low heat setting on the reverse side if necessary, using a pressing cloth. Dry cleaning is also an option for professional care.

## Sustainability & Origin

This garment is proudly manufactured in Portugal, a region renowned for its high-quality textile production and ethical labor practices. The fabric is certified by the Global Recycled Standard (GRS), ensuring that the recycled polyester content meets stringent environmental and social criteria. By utilizing recycled materials, we aim to reduce our reliance on virgin resources and minimize our environmental footprint. While individual garment carbon footprints vary, our commitment to GRS-certified materials represents a step towards lower impact production.
