Material & Fabric Composition

Crafted for comfort and durability, the "Sahara" Blazer features a premium blend of 70% Linen and 30% Viscose. This combination ensures the natural breathability and textured charm of linen, while the viscose content adds a beautiful drape, reduces creasing, and enhances the fabric's softness against the skin. With a fabric weight of 180 GSM, it strikes the perfect balance between structure and lightness, making it suitable for year-round wear. The fabric boasts a subtle slub texture characteristic of linen, lending an organic and sophisticated feel.

For best results and to preserve the linen's natural texture, line dry in the shade. Iron on a low heat setting, preferably while damp, to remove wrinkles and reshape. This garment is suitable for professional dry cleaning, should you prefer.
